

My dear children,

C.S. Lewis had once said "you can't go back and change the beginning..." These terrible times were neither wanted nor anticipated, but now that we are all in this crisis we must be brave and keep doing what we must. Your school, your teachers miss you as much as you miss being inside your classrooms. However, learning should never stop. The Extramarks app arranged by your school and its materials are there to make sure you don't miss out on your education, the detailed materials, tests and the engaging videos that this app provides will help you gain better understanding of the subjects and polish your knowledge as well as your skills. Your teachers are and will always be there to help you out if you stumble on this new path of learning but first you must start walking on it. All of us in the school had put a lot of time to make sure what we bring to you will help you become better learners and at the end of this when you come back to your school you come back as a better version of yourself. For C.S.Lewis had also said "... You can start where you are and change the ending."

Some dos and don'ts for you to keep in mind while you are using Extramarks.

Do's

1. Be patient and go through all the features.
2. Keep subject wise separate notebooks with you, make sure to note important points from the videos.
3. Solve the tests given by the app. This way you will have a clear idea of how much you have learnt.
4. Prepare a timetable for yourself and practice the subjects accordingly.
5. In case of any doubt feel free to contact the concerned teacher.
6. Understand that this virtual classroom is a compulsion and not an alternative in the present scenario.
7. Involve your parents, their guidance is of paramount importance.
8. Please refer to the school website only for all notifications and announcements and don't believe in any rumours.

School contact number: 7479049280/6294512034

Don'ts

1. Don't be irregular, the school may be closed but learning isn't.
 2. Don't lose patience while using the app if the network connection isn't strong. Go through your previous notes.
 3. While you are using the app, make sure you are not getting distracted by other apps on your phone/computer.
 4. Don't refresh the page in middle of a session.
 5. Don't take the app lightly as the material provided here is as useful as any other form of study material.
 6. Don't put off today's work for tomorrow, we are uncertain of when things will get back to normal. Hence there won't be much time (specially for classes who will be appearing in their board exam next year) to finish your syllabus if you don't start now!
- Wish you all happiness and success in all your endeavours.

Principal sir
